# ABOUT US

Every day, valuable design hours are lost coordinating manual laminate pasting, tracking down uncelebrated ply, or worrying about bubbling and delamination.

We are TerraLam Plywood Industries, are redefining interior substrates by manufacturing a truly unique product: factory-finished Pre-laminated Plywood. By eliminating manual on-site pasting, we ensure a zero-bubble, perfectly balanced, factory-pressed finish every single time. Engineered in versatile 9mm, 12mm, and 18mm thicknesses, we offer this innovation across both Premium MR Grade for pristine vertical panels and BWP (Boiling Water Proof) Marine Grade for high-moisture modular kitchens and vanities. At TerraLam, we provide the flawless canvas your premium designs deserve—saving you execution time without ever compromising on aesthetics.
